

SUPERSTORE SALES DASHBOARD USING MICROSOFT EXCEL

Project Overview

The Superstore Sales Dashboard is an interactive Business Intelligence dashboard created in Microsoft Excel. It analyzes retail sales using Pivot Tables, Pivot Charts, KPI Cards and Slicers. The dashboard provides insights into sales performance, profitability, customer segments, product categories and regional trends to support data-driven business decisions.

Objectives

- Analyze overall sales performance.
- Monitor Total Sales, Orders and Profit.
- Compare regional and category-wise sales.
- Identify top-performing products.
- Analyze monthly and yearly sales trends.
- Support business decision making.

Dataset Information

Item	Details
Dataset	Sample Superstore
Records	9,994
Columns	21
Domain	Retail Sales
Categories	Furniture, Office Supplies, Technology
Regions	Central, East, South, West
Segments	Consumer, Corporate, Home Office

Tools Used

Microsoft Excel, Pivot Tables, Pivot Charts, KPI Cards, Slicers, Excel Functions (SUM, COUNT, AVERAGE, MIN), Conditional Formatting and Shapes.

Data Cleaning

- Removed duplicate records.
- Checked missing values.
- Validated sales and profit fields.
- Formatted dates and numeric values.
- Created Pivot Tables and Pivot Charts.

Dashboard Features

Interactive KPI cards, Pivot Charts, Slicers for Category, Sub-Category, Region and Segment, Sales trend analysis, Category analysis and Top Product analysis.

Key KPIs

KPI	Value
Total Sales	2,297,201
Total Orders	9,994
Average Sales	229.858
Minimum Sales	0.444
Total Profit	286,397

Dashboard Snapshot

Key Insights

- Total Sales exceeded 2.29 million.
- West and East regions generated strong sales.
- Technology, Furniture and Office Supplies are the major product categories.
- Monthly sales increased toward the end of the year.
- Top products contribute significantly to total revenue.
- Interactive slicers make dashboard exploration easy.

Conclusion

The Superstore Sales Dashboard transforms raw retail data into an interactive reporting solution. It enables users to monitor KPIs, analyze trends and make informed business decisions using Microsoft Excel.

Future Scope

- Connect to live data using Power Query.
- Build a Power BI version.
- Include forecasting and profit margin analysis.
